

MARU DRY FRUITS

DRY FRUIT SHOP

Project Instructor: Sir Kamran Hyder

E-PROJECT

DRY FRUITS SHOP

Group members:

Maria Kath - 1547263

Javeria Farooq - 1553946

Ramsha Warsi - 1546341

Sadiyah Saadat - 1548549

Submitted to:

eprojects@aptech.ac.in

Project Instructor:

Sir Kamran Hyder.

ACKNOWLEDGMENTS

We would like to express our sincere gratitude to our faculty and instructor for their invaluable guidance and support throughout this project. Their insights and encouragement have been instrumental in our learning and the successful completion of our website.

We are also grateful for the opportunity to work on this project, which has provided us with a valuable learning experience.

A special thanks to our group members, whose dedication and teamwork have made this project a success. Working together has been a rewarding experience, and our collective effort has been key to achieving our goals.

Lastly, we would like to extend our heartfelt thanks to our instructor Sir Kamran Hyder for his constant support and encouragement.

Thank you all for your contributions and support.

3	Site browser compatible	✓		Tested Google chrome & Microsoft edge.
4	Project zip file	✓		Created using WinRAR.

USER GUIDE:

DISCLAIMER:

Not all design features are appropriate in all cases. These are always exceptions, and there are many examples of these features being used incorrectly, overused, or applied without sensitivity to the overall "symphony" of a site design.

You can't just take all these elements, throw them together, and expect to create a good webpage, any more than you can take some eggs, sugar, and flour, throw them together, and get a cake.

Creating a webpage that works requires a great deal of sensitivity to the various forces at play. A good design solution is one that balances these often opposing forces.

INTRODUCTION

The thirst for learning, upgrading technical skills and applying the concepts in real life environment at a fast pace is what the industry demands from an IT professionals today. However bust work schedules, far-flung locations, unavailability of convenient timeslots pose as major barriers when it comes to applying the concepts into realism. And hence the need to look out for alternative means of implementation u the form of laddered approach.

The above truly pose as constraints especially for our students took with their busy Schedules, it is indeed difficult for our students to keep up with the genuine and constant need for integrated application which can be seen live especially so in the field of IT education where technology can change on the spur of a moment. Well, technology does come to our rescue at such times!!

Keeping the above in mind in tune with our constant endeavor to use technology on our training model, we Aptech have thought of revolutionizing the way our students learn and implement the concepts using tools themselves by providing a live and synchronous e-project learning environment!

WHAT IS THIS EPROJECT

Eproject is a step-by-step learning environment that closely simulates classroom and lab-based learning, enabling actual implementation of concepts. It is a project implementation tool at your fingertips! This electronic, live platform allows you to:

- ❖ **Practice step by step:** Follow a ladder approach to learning.
- ❖ **Build robust applications:** Create larger, more complex applications over time.
- ❖ **Utilize specific utilities:** Incorporate various utilities into your designed applications.
- ❖ **Unify code:** Develop a single program that integrates multiple functionalities, leading to a complete application.
- ❖ **Learn concept implementation:** Apply theoretical concepts in a phased and practical manner.
- ❖ **Enhance skills and add value:** Improve your skills and add significant value to your capabilities.
- ❖ **Work on real-life projects:** Gain experience by working on projects that mimic real-life scenarios.
- ❖ **Create complex and useful applications:** Tackle real-life scenarios to develop more intricate and practical applications.
- ❖ **Receive mentoring:** Get support through email mentoring.

Eproject helps you transition from learning to implementation, providing a comprehensive environment to enhance your skills and work on real-life projects.

Students at the center are expected to complete this Eproject and send the complete project along with the documentation to eprojects@aptech.ac.in .

We look forward to a positive response from your end.

OBJECTIVES OF THE PROJECT

The objective of this program is to provide a sample project that simulates real-life projects. These applications will help you build larger, more robust applications.

- ❖ **Focus on Real-life Scenarios:** The objective is not to teach you JavaScript or Dreamweaver, but to provide you with a real-life scenario to help you create basic applications using these tools.
- ❖ **Preparation:** You can revise the relevant chapters before starting with the Eproject.

Target Audience

This project is designed for students who have completed the Dreamweaver module. These programs should be completed in lab sessions with the assistance of faculty if required.

Essential Requirements

- ❖ **Understanding of the Subject:** It is crucial for students to have a clear understanding of the subject matter.
- ❖ **Project and Assignment Completion:** Students should thoroughly review the project and complete the assignments as per the given requirements.

Support

If you have any doubts regarding the application or its objectives, kindly get back to us at eprojects@aptech.ac.in .

Introduction

Welcome to our newly designed website for **Maru Dry Fruits** an esteemed dry fruit shop with a rich heritage. Our goal is to bring our traditional, high-quality products to a wider audience through modern, effective marketing. This website is crafted to offer users an easy-to-use and aesthetically pleasing purchasing experience. Explore our wide range of premium dry fruits and enjoy seamless shopping from the comfort of your home. Thank you for choosing us to meet your dry fruit needs.

Project Requirements

Hardware/ Software Requirements

Hardware

- A minimum computer system that will help you access all the tools in the
- courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

Software [Either or Combination as per Course/Sem]

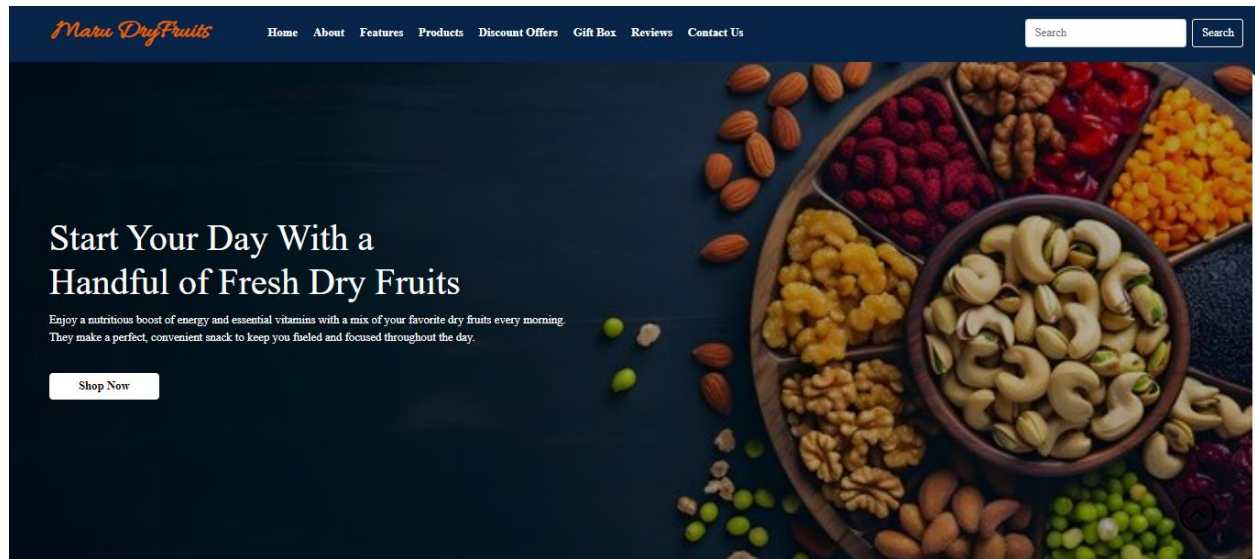

- Notepad/HTML editor/CoffeeCup
- Angular / Angular JS / React / BootStrap
- Dreamweaver / Figma
- MS IE / Chrome / FireFox / Netscape /MS Edge

Project Designing

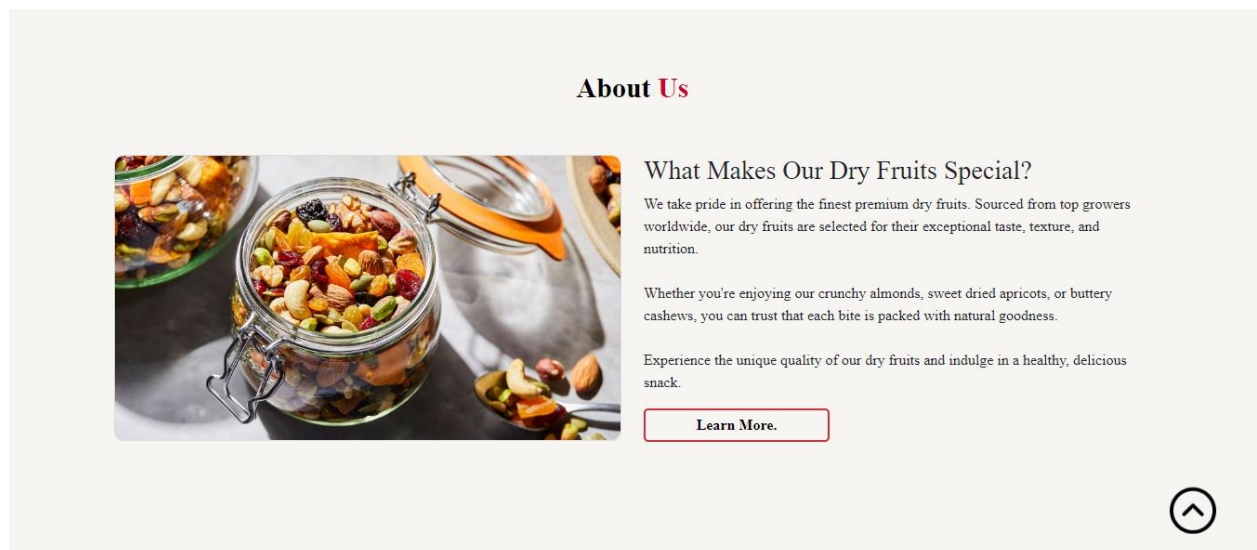

The Web site is to be created based on the following requirements.

- The home page must be designed with a beautiful color combination and all the required links properly defined. Additionally, all sections of the webpage must be utilized to avoid blank spaces.
- It should include all varieties of dry fruits, with their rates specified according to quality.
- The site should also provide nutritional information about each dry fruit.
- Customers should be able to buy online, specifying the quantity they desire.
- The site should display various offers and discounts announced from time to time.
- It should also include festival gift packs.
- The "About Us," "Contact Us," and "Disclaimer" pages must be included.
- The Contact Us page should display contact details and location using a GeoLocation API (e.g., Google Maps).
- A facility for creating an account can also be added.
- A dummy procedure for buying should be included.
- A sitemap must be added.
- Navigation throughout the project must be smooth.
